

**Plan of Study for Specialization Track**

---

Student Name: \_\_\_\_\_

UFID: \_\_\_\_\_ Term Requested: \_\_\_\_\_ Credits: \_\_\_\_\_

Lab: \_\_\_\_\_

Provide a plan of study below to include the following information as outlined in the BME Policy for Counting EGN4912 Credits in BME Specialization.

- A detailed description of how you will participate in active research activities in the laboratory, such as design of experiments, prototype development, data collection, data analysis, and/or presentations.
- An outline of laboratory expectations that align with departmental expectations for undergraduate research commitment per credit hour assigned.
- A description of how the student will be evaluated and which activities, reports, and presentations are expected for the activity. It is also recommended that the student perform a midterm and final presentation in the group's laboratory meeting.

Plan of Study:
