

Internship Positions:

Scientific Affairs:

The Scientific Affairs intern would be responsible for performing and writing up literature searches to support new or ongoing product development projects. In addition, the intern will assist with the research and writing of NIH and DoD grant proposals. Graduate student preferred.

Product Development:

Position 1: This intern will work on a process optimization project. This project will include equipment prototyping and designed experiments (DOEs). Graduate student preferred.

Position 2: This intern will perform early stage feasibility work for various product development projects. Undergraduate student preferred.
