EXECUTIVE SUMMARY:

Dr. Schmidt is a Distinguished Professor, the J. Crayton Pruitt Family Endowed Chair, and former Department Chair for the University of Florida J. Crayton Pruitt Family Department of Biomedical Engineering. Prior to joining UF, Dr. Schmidt was the B.F. Goodrich Endowed Professor at the University of Texas at Austin in both Biomedical Engineering (founding member) and Chemical Engineering.

When Dr. Schmidt stepped down as Department Chair in May 2023 after a decade in this role, the J. Crayton Pruitt Family Department of Biomedical Engineering encompassed 30 faculty, 500 undergraduates, 150 graduate students, and 21 department staff. UF BME graduate and undergraduate programs were ranked 12th and 10th, respectively, among national public programs (U.S. News & World Report, USNWR). The undergraduate BME program first became ABET accredited in Fall 2019 and the graduate program ranking climbed over 21 spots (public) and almost 30 spots (overall) since 2013. Dr. Schmidt launched initiatives to increase the impact and visibility of the department, enhance engagement and enrich the culture of the department by strengthening partnerships, expanding interdisciplinary research and education, and increasing opportunities to translate engineering discoveries to biomedical applications. Dr. Schmidt has been devoted to diversity and inclusion. Since 2013, Dr. Schmidt recruited 22 faculty to the department, with women faculty increasing from 2 to 16 (55% women) and Black and Hispanic faculty increasing from 1 to 7 (24% URM). Moreover, research expenditures per faculty more than tripled and UF BME received >\$3M in new gifts and foundation and industrial support for innovative research and educational programs. Prior to joining UF, Dr. Schmidt was extensively involved in curricula development and administration at UT Austin; she was one of four founding members of UT Austin's BME Department. She served as inaugural Graduate Program Chair and Graduate Recruiter and served as chair of the faculty search committee for many years, where she grew the new department to its current faculty size. She was instrumental in securing Whitaker Education funding and NSF IGERT training grants as well as implementing college programs to recruit and retain women faculty.

Dr. Schmidt has held numerous leadership positions in professional organizations, including the American Institute of Medical and Biological Engineering (AIMBE), an honorific society of over 2,000 elected fellows representing the top 2% in the field, and the Biomedical Engineering Society (BMES), which has over 6,000 members. For AIMBE, Dr. Schmidt served as President (2018-2020) and as AIMBE's Chair of the College of Fellows and as the Conference Organizer for AIMBE's 25th Anniversary Meeting. As President, she introduced a new nomination process to focus on impact, which has increased diversity in fellows, and launched the AIMBE Impact Awards. For BMES, Dr. Schmidt served on the Board of Directors from 2011-2015 and served as Conference Chair of the 2010 Annual BMES Meeting (with over 3,000 attendees). She has also served as Chair of the BMES National Meetings Committee, Chair of the BMES Diversity Committee, and is a recurring member of the BMES Fellows Selection Committee and the Awards and Nominations Committees.

Dr. Schmidt has over 25 years of experience in neural tissue engineering and wound healing, with over \$25M in funding and over 185 peer-reviewed papers and chapters (H-index=66), 34 issued U.S. patents, and has trained over 18 post-doctoral engineers and scientists (67% women and URM), 50 graduate students (50% women and URM), and hundreds of undergraduates in her laboratory. Dr. Schmidt is also active in innovation, commercialization, and clinical translation efforts. Her work is the foundation for the Avance Nerve Repair graft from Axogen (over 75,000 grafts implanted in patients) and VersaWrap from her affiliated start-up company, Alafair Biosciences (over 12,000 grafts implanted). Alafair Biosciences was recently listed on the 2023 Inc.5000 list of *Fastest-Growing Private Companies in America*. Dr. Schmidt is a Section Editor for *Current Opinion in Biomedical Engineering* and served as the inaugural Deputy Editor-in-Chief for *Journal of Materials Chemistry B*, a publication of the Royal Society of Chemistry, from 2012-2016. She currently serves on editorial boards for *Acta Biomaterialia*, *Journal of Neural Engineering*, *Tissue Engineering Part A*, *Journal of Biomedical Materials Research A*, *Journal of Biomaterials Science-Polymer Edition*, *International Journal of Nanomedicine*, and *Nanomedicine*.

Dr. Schmidt has received numerous major awards and recognitions. She is a Fellow of AIMBE, the National Academy of Inventors (NAI), the Biomedical Engineering Society (BMES), the American Society for the Advancement of Science (AAAS), the International Academy of Medical and Biological Engineering (IAMBE), and the International Union of Societies for Biomaterials Science and Engineering (FBSE/IUSBSE). She is an inductee into the Florida Inventors Hall of Fame and an elected member of the Florida Academy of Science, Engineering and Medicine of Florida (Florida's equivalent to the National Academies). Dr. Schmidt has received other prominent recognitions, including AIMBE's prestigious Pierre Galletti Award, the BMES Diversity Award (UF BME Representative), the TERMIS-AM Commercialization/Innovation Award, the Clemson Award for Applied Research from Society For Biomaterials, the American Competitiveness and Innovation Fellowship from the National Science Foundation, and the Chairmen's Distinguished Life Sciences Award from Christopher Columbus Fellowship Foundation and U.S. Chamber of Commerce.
